Introduction

Welcome to the Al Ittihad National Private School - Abu Dhabi (INPS). The INPS provides great educational services to a wide range of students.

We believe parents are the main influence in children's lives. Our goal is to build a relationship with the child and with the family. As your child develops a sense of trust in us and the school environment, they learn to separate from you with confidence knowing you will return at the end of the school day. We respect each person's need to experience the separation process in his or her own way, and are here to help the children express their feelings as they build meaningful relationships with us. We believe that when a child's social and emotional needs are met, he or she can participate fully in the wide range of learning opportunities here at school. Children will become familiar with the routines of a classroom environment and benefit from gaining a sense of what it is like to be part of a larger group.

We invite families to become involved in all aspects of our mission. For more up to date information, we encourage you will view our web site at www.inpsabudhabi.com. We like to build connections between the child's day at school and life at home. We invite you to share your ideas, questions and concerns with us. We hope you will visit the classroom and share aspects of your family life with us. Our goal is to build a sense of community and trust between children, parents, and staff.

The purpose of this Family Handbook is to provide an organized source of detailed information specifically related to the ways that families can partner with the school to ensure a high-quality experience for all. Please have all of your children's primary caregivers (e.g., extended family, nannies, etc.) review the handbook and other materials.

We look forward to collaborating with you as our most important partners through this noble journey.

Brief History of the School

The very first branch of Al Ittihad Private School was established in 1975 by group of U.A.E. nationals seeking a school that could provide excellent education opportunities for their children. In 1976, the late Sheikh Rashid Bin Saeed Al Maktoum granted the school its current land area in Al Mamzar and thus paved the ground to the foundation of a school teaching classes from kindergarten to grade 12.

In order to meet the ever-growing needs of a fast modernizing UAE, ownership of the school transferred to the Al Arabia for Educational Development in 1996, a body of elite national businessmen interested in further developing and expanding educational needs and facilities. Al Arabia for Educational Development's objective is to provide educational services that can meet the vital needs of the modern world.

As the years progressed, the need to open more branches arose. Thus, Jumeira branch was inaugurated in 1996, followed by Al Ittihad National Private School - Al Ain in 2004, and Al Ittihad National Private School - Abu Dhabi in 2006 and lastly Al Ittihad National Private School-Shakhbout Branch was opened in 2018.

Schools are not established for the sole purpose of academics but also as causeways to fine-tune the characters and the social awareness of students. This educational philosophy pressed us to construct a curriculum that teaches values pertaining to our Arab and Muslim culture, whilst still maintaining the modern visions of education around the world.

Curriculum

Statement of Curriculum

Al Ittihad National Private School – Abu Dhabi aims at fostering a high standard of bilingual comprehensive education from its KG1 through grade 12 programs that meet and integrate both national and international standards. INPS – Abu Dhabi uses Arabic and English as the main mediums for communication and instruction. This implies the use and maintenance of both languages in the daily teaching and learning experiences.

INPS- Abu Dhabi curriculum provides the students with the skills needed for acquisition of knowledge, harmoniously balanced with UAE culture, heritage and religion.

INPS-Abu Dhabi curriculum is based on the newly adopted American Common Core standards (California State Standards) for English, Mathematics, P.E., Art and NGSS standards for Science. The school also offers the MoE curriculum for Arabic, Islamic and Arabic Social studies. These curricula are rich in various resources and strategies to promote students' needs and skills through all grades. The curriculum also integrates a range of competences and values that are designed to assist in generally raising the level of educational outcomes and to meet the best international standards.

The ICT curriculum in KG & Primary is integrated with subjects using Tiggly, STEAM Park, Osmo, Learn to Learn, Story Starter, We do, Simple and Power machines and Sphero. In middle school it integrates powerful STEM/STEAM learning into the classroom. We use project –based curriculum “Robotics” that enable the students to build, program and command their own **LEGO robots**. These programs help students to develop their 21st-century skills and help them build information literacy and digital citizenship skills, become knowledgeable about cloud initiation, search strategies, digital footprint, Internet safety, cyber bullying and creating their own websites

Swift Playgrounds is a revolutionary app which we teach in grade 9 — a powerful programming language used to build today's most popular apps

In High school we believe coding is an essential skill. Learning to code teaches our students how to solve problems and work together in creative ways. And it helps them build apps that bring their ideas to life. We think everyone should have the opportunity to create something that can change the world. So we introduce the **XCode** program that lets anyone learn, write, and teach code and the **Arduino** which is a great resource to learn about variables, arrays, control, loops

Adobe **After Effects** is a digital visual effect, motion graphics, and compositing application which we teach in high school and which is used in the post-production process of film making and television production. Among other things, After Effects can be used for keying, tracking, compositing, and animation.

High School Credits & Electives

The purpose of the placement test is to give an indication of students' performance level(s) to be able to provide proper learning support and not for the purpose of accepting or rejecting a student.

INPS believes that our children, including those identified as having Special Educational Needs have a common entitlement to a broad and balanced curriculum. We are committed to meeting the educational needs of

students with mild to moderate Special Educational Needs in the least restricted environment (Corresponding to Private School's Policy 48, Article 53 of the Organizing Regulations).

Provision

SEN is a whole school responsibility; every member of staff should contribute to the education of students with SEN. The essence of effective SEN provision is teamwork and cooperation amongst team members. The team consists of everyone involved with the education and well-being of the students: Academic advisor, section principal, coordinators, teachers, social counsellor, SEN teacher, SENCO, and the nurse.

Students with SEN are the responsibility of all teachers and differentiation is the key to making the curriculum accessible. Some students may require additional support inside or outside the classroom; individually or in a small group situation, depending on their individual needs.

Procedure

Al Ittihad National Private School recognizes the importance of early identification and intervention. The school undertakes a graduated approach to the identification, assessment and support of students with SEN. This is carried out through 3 stages: Differentiation, Learning Support/ Intervention, and SEN Support.

SEN Support

If the student does not make adequate progress, despite the support provided by the school, then parents are advised to seek a comprehensive assessment by external support agencies.

- The resulting diagnosis will be supported by an Individual Educational Plan (IEP), written by the SENCo in consultation with the parents, SEN teacher, the social counselor, the student's teachers and, where appropriate, the student.
- The school will provide the student with specialized intervention by the SEN teacher.
- Members of the student support committee will review the progress on a termly basis.

Individual Education Plan

An Individual Education Plan is developed for students who have formal documentation of a diagnosis from an Educational psychologist or other specialists and therapists. The IEP will be communicated to teachers, parents, and other professionals. When appropriate, students will be encouraged to participate in their own IEP process. The IEP will be reviewed at least twice a year.

Role of Parents

Parents are key partners in the education of their child. Parents are encouraged to exercise their parental responsibilities with respect to their child's needs. The school actively seeks to work with parents and values the contribution they make. Parents must inform the school if their child is diagnosed with Special Educational Needs. Parents' participation in the special education decision-making process is vitally important. Parents are committed to attend all IEP meetings and to take an active role as a member of the (IEP) team that determines

a student's path. The IEP team is charged with making educational decisions for students, and addresses issues such as eligibility, evaluation, and program development.

Parents have to attend all IEP progress report meetings, Transition meetings, in addition to any scheduled or urgent meeting to discuss the medical, academic, behavioral and/ or social emotional needs of the student.
